Application for Underground and Utility Permit within Delta County Road Right-Of-Way

DELTA COUNTY PLANNING DEPARTMENT
501 PALMER ST. DELTA, CO 81416
Phone: 874-2110 Fax: 874-2500

IMPORTANT PLEASE READ:

Please fill out the following application. After you have filled out the form, mail it back with your remittance, or return to this office. Hours are 8:00 a.m. to 5:00 p.m., Monday through Thursday. Make checks payable to **Delta County**. This application will not be processed without the fee attached.

Fee:

Permit fee for bore	\$20.00
Road cut gravel	\$70.00
Road cut oiled or paved	\$250.00
Work in County Road ROW	\$20.00

(Additional weed control fees may be required for working in County Road Right of Way)
(Contact the Planning Department for total footage fee)

This permit must be obtained at least 48 hours prior to the planned commencement of construction. If a road closure is requested, the permit must be obtained at least seven (7) days prior to the planned commencement of construction. The Foreman of that District needs to be informed so he can put it on his schedule.

District #1 Larry Record (970) 874-2133

District #2 Dan Sickles (970) 856-6800

District #3 John Allen (970) 872-3254

Mail form back to the following address:

GENERAL PROVISIONS

1. A permit must be obtained at least forty-eight (48) hours prior to the planned commencement of construction. If a road closure is requested, the permit must be obtained seven (7) days prior to the planned commencement of construction
2. The applicant shall submit construction plans, specifications and a written schedule covering the general sequence and staging of the work to be performed. A sketch will suffice for minor installations.
3. An applicant may be required by the Board to conduct traffic counts or provide an engineered design or other studies to assist them in their decision process. All such work shall be done at the applicant's expense.
4. If it is determined during construction that the installation cannot or will not be installed as planned, the Planning Department will be notified immediately and a new permit will be issued and a fee adjustment made as necessary.
5. Adequate warning signs, barricades, lighting, flags and other devices shall be utilized throughout the period of work.
6. Any person who violates any provision of the Delta County Access and Utility Installation Code shall be guilty of a class 2 petty offense and upon conviction thereof shall be punished by a fine not to exceed the amount specified by D.R.S. 30-15-402.
7. In the event of non-compliance with the permit, the applicant shall be notified to repair defects immediately. Failure by the applicant to repair these defects within the noticed time limit shall allow the County to make such repairs at the applicant's expense.
8. All contractors performing work pursuant to this permit shall warrant their work for a period of one (1) year from the date of completion and acceptance thereof.
9. Lateral installations are to be placed outside the roadbed and drainage ditch areas.
10. Open-cut trenching shall be allowed for underground transverse installations unless boring or jacking is stipulated by the respective County Commissioner.
11. Open-cut trenching on paved roads will require unshrinkable fill material for cut restorations. All costs associated will be borne by the applicant and are not included in the permit fees. Specifications for the fill shall be as required by the Board of County Commissioners.
12. All utilities shall be installed in accordance with the plans approved by the utility owner.
13. Permittee, or their authorized representative, shall inform all individuals, associations, companies or other entities having utility facilities within the road right-of-way of construction plans prior to beginning of the project.
14. Permittee shall be responsible for all injury or damage to other utility facilities and private property within the right-of-way.
15. The Delta County Road Department will not be responsible for any damage that may result from maintenance of the road to the installation placed inside Delta County right-of-way limits.
16. Minimum installation depth shall be as required by the utility or County Commissioners.
17. Grading shall be done as may be necessary to prevent surface water from flowing into trenches or other excavations.
18. Pavement will be cut with a vertical face 2 feet beyond the trench walls and along a straight line. Asphalt paving damaged or removed by the Contractor shall be replaced
19. Clay and similar material with a plasticity index in excess of 20 will not be considered suitable for backfilling the trenches located in improved streets and roads.
20. Ordinary backfill in roadways shall be compacted to a minimum of 95% of maximum density as determined by AASHTO T180, latest issue. Ordinary backfill not in roadways shall be compacted to a minimum of 90% density.
21. All excavations made in paved streets must be completely restored within three days after completion of backfilling. Any and all damage occurring to the road and/or right-of-way as a result of the installed utilities shall be assessed against the applicant or his/her successors.
